Email

The opinion given is rendered without knowledge of some of the individual parts of the home sewage and water systems and applies only to the date and time the opinion is made. Therefore this opinion does not guarantee the future performance of either the home sewage or water system

IMPORTANT – PLEASE READ

Water sample results will **not** be available until approximately 72 hours after sampling. This time will be extended where weekend and holidays are concerned.

A positive water sample result may necessitate thorough disinfection of the system in question. A \$60.00 fee will be charged for each additional sample requested.

This department recommends that all private water systems be thoroughly disinfected two to four times per year.

Due to their predisposition to contaminant infiltration, this department is not able to recognize dug wells and unfiltered/untreated cisterns as approved sources of potable drinking water.
