

LEAD

Testing for Children in Erie County

Lead is a toxic metal used in a variety of products and materials. When lead is absorbed into the body, it can cause damage to the brain and other vital organs, like the kidneys, nerves, and blood. Lead poisoning can cause headaches, stomachaches, nausea, tiredness and irritability. Lead can also harm children without causing any obvious symptoms.

**Children between the ages of
0 months to 6 years old
can receive a **free** lead test**

Locations:

**Erie County Public Health Outreach Clinics
Located at various township or village halls
throughout Erie County**
